AFFLATUS'S STALL

INNOVATIVE TEACHING IDEA

- Problem:** Students found sustainability and plastic consumption concepts abstract and textbook-bound.
- Solution:** Green School Project – experiential, student-led sustainability practice integrating plastic audits, reuse, and action-based learning.

IMPLEMENTATION PROCESS

Formed a **Green Committee** & **Eco Club**, conducted baseline plastic audits, appointed Green Monitors, and implemented reusable alternatives and plastic recycling activities.

EVIDENCE PROVIDED

Look Around

IMPACT

Visible reduction in single-use plastic, increased use of reusable materials, strengthened student leadership, and sustained eco-friendly practices embedded into school routines.

SMALL DAILY ACTIONS, WHEN PRACTICED
CONSISTENTLY, LEAD TO LASTING ENVIRONMENTAL
CHANGE.
